

BUILDING A PREEMINENT Nickel Exploration Company

OUR HIGH QUALITY PROJECTS

Muskox (Ni-Cu-PGM)

- Nunavut
- Camp-scale Ni-Cu-PGM opportunity
- SPC holds over 45,000 hectares
- High-grade mineralization at surface.
- Values up to 5.39% Ni, 2.88% Cu, 7.61g/t PGM in grab samples.
- 2022 Summer mapping and sampling program

Lockerby East (Ni-Cu-PGM)

- Sudbury Mining Camp
- Advanced exploration, past producer
- Indicated Resource – **8.55Mt @ 0.45% Ni, 0.31% Cu**
- Inferred Resource – **2.00Mt @ 0.38% Ni, 0.30% Cu**
- High-grade zone with value >1.0% NiEq.
- 4,200m of drilling planned for 2022
- Updated Resource estimate for 2022

Janes (Ni-Cu-PGM)

- 50 km east of Sudbury
- Early stage exploration
- Widespread near-surface Ni-Cu-PGM mineralization
- 2021 drill program **returned 0.51% Ni, 1.04% Cu, 5.10g/t PGM** over 9.0 metres.
- 2022 Program to include geophysics and diamond drilling

Aer-Kidd (Ni-Cu-PGM)

- Sudbury Mining Camp
- Located between 2 world class Ni assets (Totten Mine, Victoria deposit)
- Advanced exploration, past producer

PATH TO SUCCESS

EXPERIENCED MANAGEMENT

Grant Mourre President & CEO - Mr. Mourre has more than 20 years of experience in the mineral exploration business primarily focused on magmatic Ni-Cu-PGM mineralization in the Sudbury Basin.

Scott McLean Executive Director - Mr. McLean Scott has over 30 years of experience including 23 years with Falconbridge Limited and has been awarded the PDAC Prospector of the Year for his discovery of the 17 million tonne Nickel Rim South Mine in Sudbury, Ontario.

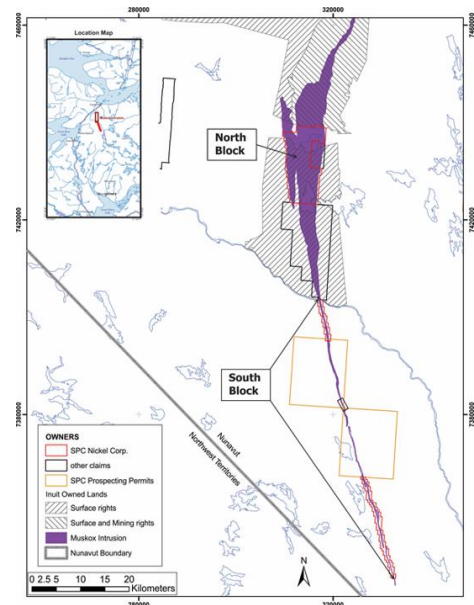

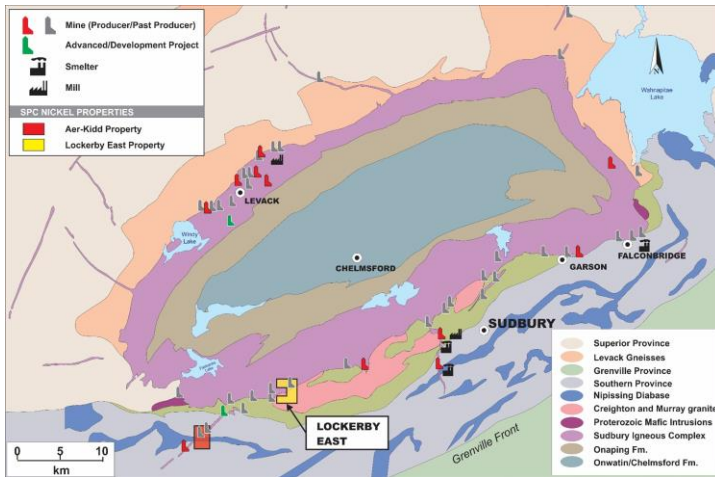

Guy Mahaffy CFO - Mr. Mahaffy Guy has over 25 years of experience, including 18 years serving in the role of CFO, Corporate Secretary and Board member of several public companies listed on both the Toronto Stock Exchange and the TSX Venture Exchange.

LOCKERBY EAST

- Hosts both the historic West Graham and Lockerby East deposits
- Drilling just commenced. 14-hole program designed to further evaluate and expand the extent of the high-grade Ni-Cu zone hosted within the larger West Graham deposit
- Within the larger resource, a distinct zone of higher-grade mineralization grading in excess of 1% Ni is present
- Excellent opportunity to establish a shallow nickel sulphide resource amenable to low-cost open pit mining

MUSKOX

- A camp scale Ni-Cu-PGM opportunity related to the Proterozoic-aged MacKenzie magmatic event
- The Muskox Intrusion has similarities to many of the worlds other well-known Ni camps (Noril'sk, Voisey's Bay, Sudbury)
- SPC controls a 100% of the mineralized Muskox feeder dyke that extends over a strike length of 60 km and has historically seen only 2 shallow drill holes
- At both the Spider Lake and Marceau Lake areas, high-grade Ni-Cu-PGM samples have been reported over strike lengths of 4 km

INVESTMENT SUMMARY

- Four quality Ni-Cu-PGM projects ranging from the resource stage (Lockerby East) to big picture camp-scale (Muskox) all located within the stable jurisdiction of Canada
- Advanced stage West Graham deposit with historic resource of 10.5Mt @ 0.60% NiEq (100M lbs. of contained NI and 70m lbs. of contained Cu)
- Fully funded 2022 Exploration Program should provide steady news flow
- Strong investor base with a long-term vision
- Well-positioned to take advantage of the forecasted growth in the Ni, Cu, and PGM markets

52-WEEK STOCK PERFORMANCE

CAPITAL STRUCTURE

MAJOR SHAREHOLDERS

Shares Outstanding	124.9 million
